

T32 Precision Lifestyle Medicine and Translation Research ([PREMIER](#)) Postdoctoral Training Program

The program objective is to provide **postdoctoral** fellows who aspire to be both independent investigators and team scientists in lifestyle medicine the opportunity to develop expertise in translational research for the prevention and control of cardiovascular and respiratory chronic conditions.

Fellows can focus their research and skill developments in either of these cores of central interest:

- Mechanistic Explorations of Behavior & Behavior Change
- Behavioral Sciences for Multi-morbidity Prevention & Control
- Population Health Equity & Policy

Eligibility:

- U.S. citizen or permanent resident
- Not already received 2 years of post-doc funding from NIH training grants
- PhD and/or MD or equivalent by start of training

Application timeline:

- Applications deadline: July 31, 2018
- Earliest potential fellowship start date: October 1, 2018

Please visit go.uic.edu/PREMIER for more details,
To apply, complete and submit the [PREMIER Application](#)

Documents needed for application:

- Curriculum Vitae (CV)
- Personal statement (One page, summarizing your proposed research, career plans, prior research experience and possible future mentor)
- List of the names of three professional references.

Three letters of recommendation (Include one letter from most recent research mentor) to be e-mailed directly to Julia Henkins (jhenki3@uic.edu).
