

Verbal Interference Test

The Verbal Interference Test is a behavioral assessment of cognitive regulation found in a web-based assessment (“Webneuro”) downloaded from Brain Resource (brainresource.com).

Again, a word will be shown in the centre of the screen.
There will be 4 response buttons below the word.
This time, CLICK on the button that names the **COLOR** of the word.
For example, if the name of the word is green, and the word is presented in red, CLICK on the RED response button.
Please respond as quickly and accurately as possible.
Click START to begin the test.
